

SOMMAIRE

- I. T. SIMON, *A remark on the \mathcal{L}_1 -norm of Brownian motion.*
- II. Ch. BOUVEYRON, J. JACQUES, *Model-based clustering of time series in group-specific functional subspaces.*
- III. J. JACQUES, *Pratique de l'analyse de sensibilité : comment évaluer l'impact des entrées aléatoires sur la sortie d'un modèle mathématique.*
- IV. C. BIERNACKI, G. CASTELLAN *A data-driven bound on variances for avoiding degeneracy in univariate Gaussian mixtures.*
- V. F. GRAICHE, D. MERABET, D. HAMADOUCHE, *Testing epidemic change in the variance.*
- VI. Y. TALEB, F. ACHEMINE, D. HAMADOUCHE, A. AISSANI, *Asymptotic study of a busy period in a retrial queue.*
- VII. J. JACQUES, C. PREDA, *Model-based clustering of functional data.*
- VIII. J. MARKEVIČIŪTĖ, A. RAČKAUSKAS, Ch. SUQUET, *Functional limit theorems for sums of nearly non stationary processes.*
- IX. A. RAČKAUSKAS, Ch. SUQUET, *On the distribution of sequential Hölder norms of the Brownian motion.*
- X. D. COUPIER, D. DEREUDRE, *Continuum Percolation for Quermass Model.*
